Candowipe – airwipe

Our multi wire cleaning plant cleans the wire very efficiently with a well-proven bipolar electrolytic process.

The Candowipes are designed for making the most of your wire treatment application:

- Time saving, as no wire threading is necessary
- Easy to change to fit different wire diameter
- Saves air while not in use

The Candowipe is available in two different versions:

Candowipe, **pat**

Candowipe Cap.

Candowipe, **pat** is manufactured after each wire diameter and we can design it after your needs.

Candowipe Cap is developed with ceramic inserts. Every insert has two sizes of tracks for the wire, which can be easily turned. In the cap is a spare insert, which at the same time is a support for the wire. This type is available in two models:

- The model in below picture and as described.
- The inserts are mounted in opposite positions.

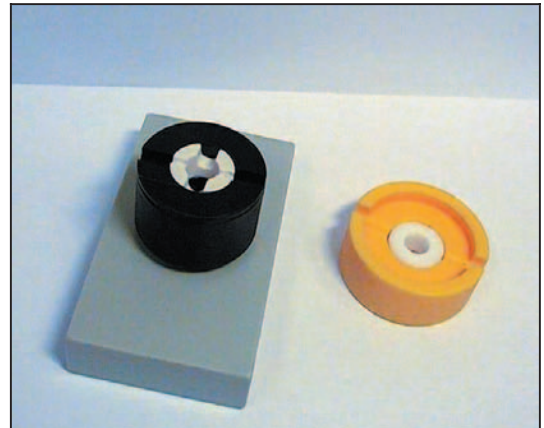

The air consumption for one Candowipe for 2 mm wire is approx. 0,047 m³/min at 50 mbar.

The material in the wipes are high quality wear resistant plastic.

Candowipe pat.
