

Elucidation of Intentions

ENVIRONMENTAL POLICY

CANDOR Sweden AB is one of the leading suppliers to wire and surface treatment industries, a line of business where it is of great importance to consider environmental aspects. Therefore we also have a special responsibility to help our clients to handle these issues. With our competence and special knowledge we shall support our clients to make environmentally correct choices for processes and equipment, combined with prevailing quality demands.

Environmental Considerations

- Within our own business we shall take the utmost environmental consideration, yet without failing the prevailing quality demands.
- Within our own production we shall economize the use of raw materials and energy, and keep an efficient manufacturing in order to minimize the waste load.
- In the internal daily work, we shall use materials efficiently and when possible use recyclable materials.
- We shall demand that our partners and suppliers take the same environmental considerations as we do ourselves.

Environmental Responsibility

- We shall take responsibility for our own processes, chemical products and plants.
- For our own manufacturing we shall always try to be ahead of time, concerning adjustments to possible future environmental regulations.
- All our employees have a personal responsibility to follow our environmental policy.

Continuous Improvements

- By including all employees in an active environmental work, we shall strive for continuous improvements.
- We shall actively search for:
 - Alternatives to chemical processes and products that are hazardous to health and environment
 - Environmentally efficient plants
- We shall work actively with helping our clients with improvements, by providing them with information in order to choose the environmentally best alternatives.

Education and Information

- As being one of the largest companies within this line of business, we shall keep a high level of competence concerning environmental issues.
- We shall use our competence to educate and inform our clients to handle our processes and equipments in the environmentally best way.
- We shall always provide our clients with correct and detailed information about the products.
