

## ENVIRONMENTAL POLICY

[www.candorsweden.com](http://www.candorsweden.com)

As a supplier to industries, **CANDOR Sweden AB** shall take responsibility for the products we supply. We shall consider environmental aspects as a natural part of our quality assessment, both in the daily work and for future product development.

### *Our environmental guidelines:*

**Resource efficiency.** We shall use raw materials, other materials and energy efficiently, and strive to minimize the load of waste products from our selves as well as from our clients.

**Continuous improvements.** Our environmental work shall derive from a preventive aspect and we shall strive for continuous improvements for our products and within the company.

**Products and plants.** When choosing and developing new processes, chemical products and plants we shall prioritize environmental considerations combined with prevailing quality demands.

**Manufacturing methods.** Our manufacturing work shall be performed from a preventive point of view, in order to minimize errors that may lead to an increased waste load.

**Education.** We shall internally and externally provide for the best possible information and education, in order to encourage good environmental work.

**Legislation.** We shall always follow the prevailing environmental regulations. We shall also strive to be in advance with adjusting our products for future environmental regulations.
